## Studying at GLCT

### Elie Sylvester

The school has helped me start a new life away from my parents. The staff at GLCT helped me see the world from a different perspective. Whether it was getting me on track academically or adjusting to life in Canada, I never felt alone. I didn't miss my parents as much because everyone was going through the same experience.

### Ngwa Tayuh Che

This school is built on the strong principle of diversity and inclusion when it comes to different cultures. I never really thought I'd be able to meet people from Iran, Argentina, or even Brazil, but here I am, meeting people from those places.

### Jesse Parker

The GLCT dome has been an amazing experience. It's a safe and welcoming community of people with diverse backgrounds and cultures. It gives us the opportunity to learn more about the world, how people were brought up, different types of societies, norms, and everything else.

## A Great Place to Educate your Children

### Alfreda

I'm so grateful to have found Great Lakes College of Toronto. The dedicated teachers, diverse community, and well-rounded curriculum have helped my child thrive academically and socially. I have seen my daughter grow in confidence and develop a love for learning that will last a lifetime. If you are looking for a school that truly cares about its students, look no further.

### Blessing Udoka

My daughter Dion is in a great school in Canada, and I must say it is one of the best decisions we made before she goes to any university in Canada. She has been so full of joy and happiness with all the knowledge she has acquired so far. I really appreciate how you all are taking care of my daughter. Thank you for looking after her.

### Parker Ekiti

No words can describe how thankful my wife and I are to have our four children be part of the Great Lakes College of Toronto family. I am so happy with the experiences my children have had at GLCT, which gave them a strong foundation to transition from college to university. We have witnessed massive and exponential development in them
